

Mullins on Soros

To our US DWI colleagues, Cc: Australian recipients of this email, Here is your chance to help the world esp. Australia by David Horowitz expose of the arch demon oligarch George Soros who in 2000 hand-picked the destruction of West Australian drug laws to influence US law makers into thinking that prohibition and punitive laws are more harmful than illicit drugs - pl carefully scrutinise Nadelman's plans for WA in the attachment Soros 0001.

Because of US DWI's stoic work in the USA which has achieved great success against Soros' so-called 'medical' marijuana hoax and your good Christian ethics and human values you have achieved great inroads into stopping Soros' work. As always I urge you to help 'blind' and 'soft on crime' Australia get rid of Soros' Marxist evil passion through which he seeks to destroy our families by more and more of our children turning to drugs and crime by disempowering our police and our judiciary for ultimate chaos in our society and funding many politicians to slavishly uphold the WHO/UN Human Rights Manifesto in league with our national media fully biased for the implementation of Soros' Open Society One World Government Agenda.

Soros has struck 'pay dirt' in Australia particularly in WA, due to the over-abundance and bevy of humanistic social policy researchers, many from the 60's UK left wing sociologists, zealous disciples of the Harm Minimisation Bible 'Living with Drugs' and the Merseyside Heroin Clinics. Disheartened by the failure of the UK Heroin Clinics these pragmatic fools found their niche in each and every academic social policy faculty over the last 50 years.

Via mega funds siphoned into Commonwealth social policy research agencies and crime research analysts and criminal lawyers protecting their underbelly criminal clients in league with associated non government organisations (masquerading as community 'care' support groups) Soros is instrumental in attacking Australia's National and State Enforcement of Law and Order and the laws of our Asian neighbours via the Liberal's Moderate's (Washer/J Bishop/Moylan et al) Security and Development Policy Group.

How do I know that Soros is behind these attacks on the WA Police? Because I have witnessed the biased pro-criminal law reform media campaigns for the abolition of prohibition and so-called punitive laws by *The West Australian* and the *Perth Sunday Times Weekly Opinion* Columnist Tom Percy, Criminal Lawyer and Convener of the Australian Lawyers Alliance for the abolition of Australian INCB Treaties e.g. "Upstream without a paddle" <perth NOW.com.au>

Vamping up of the attacks on police is funded by Soros' *International Harm Reduction Association HR Cops* representative, ex Seattle cop Norm Stamper's November 2010 visit to Australia sponsored by Wodak and the Hon Dr Mal Washer's *Australian Parliamentary Group for Drug Law Reform* (APGDLR) sister organisation for Wodak's *Australian Drug Law Reform Foundation*.

In November the *National Press Council* Canberra provided Soros' lieutenant the self-professed drug user Ethan Nadelman and Wodak the most extraordinary privilege of

spreading their anti-prohibition propaganda via an address to the nation without any dissenting point of view. Such unprincipled influence in 'normalising illicit drug use for the purpose of changing the way Australian's think about prohibition' is indefensible and an abuse of Australia's Media Rules and Regulations.

Unopposed, Soros funds Australia's National Illicit Drug Strategy via his UK Beckley Foundation Mike Trace and our national illicit drug research Think Tanks Group for Drug Law Reform.

Soros' humanistic antithesis to the absolute value and preservation of human life is adulated and funded by the elite creme de la creme of Australia's intelligentsia. Each year many of these iconic public health epidemiologists are accredited by the Australian and State Government's most prestigious awards such as Australian of the Year and other meritorious acclaims for the glorification of the anachronistic euphemism "Human Rights" in league with the WHO and other public health 'human rights' reforms which devalue human life such as abortion and euthanasia. In keeping with Soros' indulgent Open Society high on his hit list of social reforms are eliminating prison populations, promoting the benefits of the individual's rights to drug injecting paraphernalia, homosexual's rights, prison reforms, national sports illicit drug policy and all behaviours which devalue human life.

I urge all good Australians to fund David Horowitz' expose Soros. Thank you in anticipation, Geraldine Mullins.
