

Start at the arrow [C] and take every third letter clockwise around the circle to discover some of the startling facts regarding cannabis use according to a new study just released by Professors Stuart Reece

& Gary Hulse from the University of WA.¹ Write the letters on the lines below until you have used all the letters. **Don't be fooled** - the promotion of cannabis use has a dark side to it!

- CANNABIS -

Is it really a "miracle" cure?

GET ME OUT OF HERE!

Help Arpee to get out of the smoke-filled room. Smoking not only causes cancer, but other illnesses to children like coughing and wheezing, pneumonia, bronchitis, ear infections and asthma. Choose to stay smoke free!

We know smoking tobacco causes at least 14 different types of cancer.

A recent study has shown that cannabis may also cause more cancers than smoking. Ladies will also be at risk of breast cancer, cancer of the ovary and cervix. Men are at risk for prostate cancer.

Circle the **10** differences in the tug-of-war pictures at the top and bottom of this page. Then colour in the pictures. Every person in life is different. As we make friends, we need to respect one another's differences. We all come from different backgrounds and make different choices. Sometimes it is hard when others make fun of your choices.

"Sober in the Country" is an organisation that aims to help adults respect the choices that others make when they choose to say "NO" to a beer. They have a special day (22/2/22) to respect that choice. When you and your friends make choices to say "NO" to alcohol and other drugs, don't be ashamed of your choice if others make fun of you. It is important to respect the choices that people make.
